Professional Summary

Junior backend developer equipped to build scalable, maintainable systems using modern Node.js stacks, agentic AI workflows (RAG + LangGraph/CrewAI), DevOps tools (Docker, Kubernetes, AWS), and advanced patterns—with strong problem-solving and engineering mindset. Delivered production-grade projects and led teams, performing at a level comparable to many 4–5 year experienced developers. BS Computer Science (expected June 2026, CGPA 3.7).

Technical Skills

- **Languages & Runtimes**: Node.js (Express, Fastify), JavaScript/TypeScript, Python, React, Next.js
- **Databases & Storage**: PostgreSQL (incl. pgvector), Redis, Neo4j, Apache AGE
- **Frameworks & AI**: gRPC, LangGraph, CrewAI, RAG pipelines, Knowledge Graphs
- **Infra & DevOps**: Docker, AWS, Terraform, Kubernetes, PM2
- **Messaging & Tools**: RabbitMQ, Kafka, Firebase, Google OAuth, Nodemailer

Work Experience

- **Associate Backend Developer at 360XpertsSolutions - June 2025 – Present**
  - Advanced from intensive 2-month backend trainee to Associate Developer by delivering high-quality contributions in fast-paced client projects.
  - Individually contributed and led teams of 3–4 to deliver 3+ client projects from requirements through production deployment (pre-release/UAT), adapting to changing business needs for on-time, aligned delivery.
  - Implemented modern architectural and DevOps patterns—including multi-tenancy, RBAC, feature toggles, event sourcing for notifications/logs, per-message key rotation, performance monitoring hooks, Kubernetes-based deployments with version patching, PM2 orchestration, and async queue-based communication (RabbitMQ/Kafka)—to deliver secure, scalable, and maintainable distributed systems.
  - Mentored junior trainees to accelerate onboarding and effective collaboration in dynamic, deadline-driven environments.
- **Volunteer and RA at The Bridge of Hopes - June 2024 – Jan 2026**
  - Led a 4-person frontend team to design, develop, and deploy two interactive, responsive versions of the product website using React, enhancing user experience, mission communication, and donor outreach/contact flows.
  - Built and integrated a custom admin panel for entity management, improving operational efficiency for non-technical team members.
- **Student Lab Assistant at NUCES-FAST Karachi - August 2024 – December 2024**
  - Assisted 50+ students with lab exercises, code debugging, and real-time troubleshooting to support successful completion of DSA concepts.
  - Provided personalized guidance, answered queries, and shared practical problem-solving tips to boost student understanding and confidence.

Education

- **BS-CS (Graduation in June 2026):** In NUCES-FAST Khi, 8th Semester, maintaining a CGPA of 3.7
- **HSC part II (2022):** From Dehli Govt. College, ended the remarkable journey with 91%
